

State of the art Micro Instruments

Handmade instruments of the highest quality with Stille's unique 30 year-warranty

Stille Micro Scissors

The Stille Micro Scissors program covers straight and curved models in different lengths as well as vascular scissors with different blade sizes and angles. All models are made with the original Stille SuperCut blades for increased cutting performance in soft tissue.

The joint screw is designed to be removable at service, and thereby recreate the same unique performance after service as the new instrument was delivered with.

Stille Micro Forceps

All Stille Micro Forceps are designed to give the same unique feeling as the standard Stille forceps - a perfect spring tension in combination with perfect tip alignment and detail work. They are available with stainless steel tips or with Stille Diamond Jaws for increased durability.

The model program covers forceps with or without tying platform,

1x2 teeth, ring tips and counter-balance, straight and curved models in different lengths.

Stille Micro Needle holders

The Stille Micro Needle holders are designed to hold the finest sutures in a tight and secure grip with only a minimum of pressure from the surgeon's fingers.

All models are made with Stille Diamond Jaws and the heavier models with TC-inserts. They can be delivered as straight or curved, with or without lock and in several different lengths. For suture sizes 6/0 and finer (heavy models for 1/0-4/0).

Special models can be made on request.

Stille - Surgical Perfection

Stille is one of the oldest medical device companies in the world. We develop, manufacture and sell proprietary high-quality surgical instruments and specialty tables to leading surgeons worldwide. We have done so for more than 170 years.

Stille's offering consists of a strong brand and products renowned for their superior quality. We manage our business in two distinct business areas—Surgery and Patient Positioning.

Stille surgical instruments are considered state of the art by many surgeons around the world. All Stille instruments are handcrafted as an art by highly skilled instrument makers in Eskilstuna, Sweden.

The slender design and excellent balance are the characteristics which make the Stille Instruments easily recognizable. Their highly polished surface and delicate design make Stille instruments lighter and easier to keep clean, thus more durable against discoloration and corrosion. All this provides Stille instruments with a unique and outstanding feeling.

Surgical Perfection. For life.
