General Conditions of Sale and Delivery

1. Acceptance of the Conditions of Sale and Delivery

Our conditions of delivery and payment are exclusively

We are entitled to assign the claims based on our business connection.

2. Placing of Orders

The offers of the supplier are not binding. The contract is concluded when the supplier has confirmed the acceptance of the order in writing within a period of 4 weeks or when the delivery has been effected. All agreements have to be made in writing; this also applies to supplements, amendments and collateral agreements.

The customer is liable for the correctness of the documents to be supplied by him, especially samples and drawings.

The details, drawings, illustrations and specifications of services of the supplier included in the catalogues, price lists or documents being part of the offer are approximate values customary in the trade. Quality, design and colour are subject to customary and material deviations, if this is unavoidable due to the situation on the raw material market or due to technical reasons.

3. Delivery

Delivery dates or periods, which can be stipulated with or without binding force, have to be indicated in writing.

Delivery periods start on conclusion of the contract. Delivery deadlines are deemed to be met if the goods have left the factory/warehouse at the agreed date or at the date when the goods are ready for dispatch, as far as the dispatch or the delivery of the goods is delayed by circumstances which are under the control of the customer.

In case of subsequent amendments of the contract by the customer which influence the delivery time, it is extended appropriately.

In case of delay in delivery, an appropriate deadline for delayed delivery has to be set – starting on the date of receipt of the written notice of default made out by the customer or, in the case of delivery periods set by calendar, when these expire. This also applies to partial deliveries.

Disturbances of our business activities, especially strikes, lockouts, lack of manpower, even on the part of our subcontractors and manufacturing firms, lacking dispatch possibilities and procurement of raw material, cases of force majeure or cases, in which we are not supplied by our subcontractors and the non-supply has not negligently been caused by us, change the delivery periods by the duration of the interference with the performance of the obligation caused by these circumstances or discharge us from the delivery commitment to the exclusion of any claims for damages as far as the removal of the obstacle is not foreseeable with respect to time.

The existence of such circumstances and obstacles which are beyond our control has to be proved by us. If the abovementioned obstacles occur on the part of the customer, the same legal consequences also apply to his obligation to take delivery.

Supplier as well as customer are obliged to inform the other party of the beginning and the end of the above-mentioned kind of obstacles without delay.

4. Pricing

The prices are understood ex works plus value-added tax and do not include packing and postage.

If prices are not listed or only with the reservation "current list price", the list prices valid on the delivery day will be invoiced.

This only applies to delivery periods in excess of 4 months and to price adjustments up to 4%. Higher price adjustments require new price agreements. If such an agreement does not exist, the customer is entitled to withdraw from the contract.

In case of free delivery it is up to the supplier to determine the mode of dispatch. If goods are sent by fast freight or express, the customer bears the difference between the charges for freight and those for the accelerated dispatch, even in case of free delivery

5. Conditions of Payment

All invoices are payable within 30 days after invoicing without discount. For payments within 8 days, a 2% discount may be deducted, provided that there is no delay of payment relating to previous deliveries.

When the credit period is exceeded, the supplier is entitled to charge default interest amounting to 2% above the corresponding discount rate of the Deutsche Bundesbank. It is to be estimated at a higher or lower rate, if the supplier furnishes proof of a higher interest load or the customer of a lower load.

Money orders, cheques and bills of exchange are only accepted after a special agreement and only on account of payment, invoicing all collection and discounting charges.

If, after the conclusion of the contract, the supplier learns about facts considerably deteriorating the financial conditions of the customer and suited to endanger his claim to counter-performance according to his best and commercial judgement,

he can demand furnishing of a suitable security within an appropriate period of time or performance in return for counter-performance up to the performance date. If the customer fails to comply with the justified demand of the

supplier or does not comply with it in time, the supplier is entitled to withdraw from the contract or to claim damages for non-performance. If the customer is in arrears with a part performance, the supplier can accelerate the whole residual claim immediately. In case of delay of performance resulting from a considerable deterioration of the financial situation, the supplier can withdraw from the contract or claim damages for non-performance without granting a grace period. If the delay of performance is not property-related, the supplier can demand withdrawal from the contract or damages for nonperformance after fruitless expiry of an adequately set period of time.

The customer can only set off against claims of the supplier or effectively enforce a lien, if his counterclaim has become res judicata or has been uncontested or if the right of retention results from the contractual relationship which these conditions are the basis of.

6. Dispatch and Passing of Risk

The goods are dispatched ex factory, if not otherwise provided in the agreement, without the cheapest mode of dispatch being obligatory.

Even in case of freight-free delivery, the risk is passed to the customer when the goods are handed over to the person entrusted with the dispatch or when being loaded onto a vehicle of the supplier. The supplier is entitled, but not obliged, to insure deliveries on behalf and for account of the customer. If goods are damaged in transfer, the customer has to cause the competent authorities to ascertain the facts without delay and to inform the supplier.

Partial deliveries on a reasonable scale are permissible.

7. Reservation of Title

The supplier reserves his title to the delivered goods until all claims out of the business relation are satisfied, including the claims accruing in future even from contracts concluded with the customer at the same time or later on.

The customer is entitled to sell the goods in the ordinary course of business as long as he fulfils the obligations arising out of the business relations with the supplier in good time. However, he is neither allowed to pledge the reserved goods nor assign them by way of security. He is obliged to secure the rights of the supplier when reselling the reserved goods on credit.

If the customer gets into arrears or if duties are neglected resulting from the reservation of title, the supplier is entitled to demand the temporary return of the reserved goods at the expense of the customer and to collect them from the customer even without exercising the right to rescind the contract and without granting a grace period. The customer has not the right of possession in that case.

Possible processing or manufacturing of the reserved goods is always done by the customer for the supplier. If the reserved goods are processed or inseparably mixed with other objects not belonging to the supplier, the supplier acquires ownership of the new object in proportion of the invoice value of the reserved goods to the other processed or mixed objects at the time of the processing or mixing. If goods of the supplier are merged or inseparably mixed with other movable objects to form a homogeneous object and if the other object is considered to be the main object, it is regarded as agreed that the customer proportionally transfers co-ownership to the supplier, as far as the main object belongs to him.

All claims and rights arising from the sale of goods, of which the supplier is entitled to an ownership, are assigned by the customer to the supplier for security already. The supplier herewith accepts the assignment.

If the customer is in arrears or if other obligations are infringed arising from the agreed reservation of title, the supplier is entitled to disclose to the purchasers of the customer the assignment of the claim of the customer to the supplier and to collect the claims.

The customer has to inform the supplier without delay about execution measures of third parties levied upon the reserved goods or upon the claims assigned to the supplier or other securities, handing over the documents necessary for an intervention. This also applies to prejudices of another kind.

The supplier obliges himself to release the securities he is entitled to according to the above provisions upon request of the customer in so far as the value of the goods assigned for security exceeds the claims to be secured by more than 20%.

8. Warranty

If the delivered goods are defective or if warranted characteristics are missing, the supplier must exclusively warrant the goods within 24 months after the day of delivery in

such a way that he either remedies the defect free of charge or subsequently delivers goods free of defects. Other claims of the customer due to defects or the absence of warranted characteristics even for damages, especially for consequential harms caused by a defect, are excluded.

If the customer is a trader, he has to give notice of obvious defects immediately. If he is a non-trader, the period of giving notice of a defect is 10 days after taking delivery of the goods. If the customer fails to observe these time limits, claims for damages cannot be asserted any more.

Notice of non-obvious defects must be given immediately after the defect becomes noticeable.

Notices of defects have to be made in writing. For observing the time limit it is sufficient to post the notice of defect in time.

The requirements concerning form and time limit for notices of defect also apply to effected partial deliveries.

For remedying all defects or for substitute deliveries which appear necessary according to the reasonably exercised discretion of the supplier, the customer has to grant to the supplier after informing him, the necessary time and opportunity, otherwise the supplier will be relieved of the liability for defects. Only in urgent cases of endangering the operational safety or for warding-off disproportionately severe damages, in which the supplier has to be informed without delay, or if the supplier is in default of remedying the defect, the customer is entitled to remedy the defect himself or to have it remedied by third persons and to demand reimbursement of the necessary costs from the supplier.

If the supplier lets expire the reasonable grace period granted to him for remedying a defect or for making a substitute delivery, or if remedying the defect or making a substitute delivery has failed twice, the customer is entitled to withdraw from the contract or to demand an abatement of the purchase price. The assertion of claims for damages, especially due to late substitute delivery or failure to make a substitute delivery, late or failed remedy of defects, especially for consequential damages, is excluded.

For remedying of defects and substitute deliveries the supplier is liable to the same extent as for the original delivery item.

For substitute deliveries the original warranty period applies.

The supplier is not obliged to remedy a defect or to make a substitute delivery, as long as the customer does not fulfil his obligations under the contract.

9. Place of Performance and Jurisdiction

The head office of the supplier is the place of performance for all obligations arising out of the contractual relationship.

For all legal actions, even for special procedures deciding claims arising out of a bill of exchange and for actions for assertion of a claim concerning payment of a cheque, the exclusive "place of jurisdiction" is the "domicile of the company" if the customer is a registered trader, a legal person under public law or of the special revenue fund under public law.

This place of jurisdiction is equally applicable if the customer has no general place of jurisdiction within the country, transfers his domicile or habitual residence after conclusion of the contract outside the country or if his domicile or habitual residence it not known when legal proceedings are instituted. The contract is subject to German law as far as it has been concluded with a foreign party. The Uniform Law on the International Sale of Goods as well as the Uniform Law on the Formation of Contracts for the International Sale of Goods are not applicable.

These conditions supersede previous conditions of sale and delivery. If one of the provisions of these conditions of sale and delivery should become invalid, this shall have no effect upon the other conditions. Personal data arising out of our terms and conditions of business will be stored in our EDP.
